Prop Components Needed For A Single Billboard

There are three components that make up the luggage tag prop for a single billboard: 1) Buckle & strap, 2) Support Frame (with additional support arm, tied to the support frame for shipping), and 3) Palette containing the hardware, arm extensions, and corner extensions. One set of these three items needs to stay on the truck for delivery to Interboro Signs in Long Island City.

The pallet is already shrink wrapped and simply needs to be put onto the truck with the buckle/strap and support frame.
